Dear Friends,

We are happy to report that the Residents and staff remain Covid-free!

While we are Covid-free, there have been two situations of possible exposure requiring us to track and monitor all contacts to assure that there was not any transmission of the virus in our Home.

Those two situations were:

1. A family member who visited a Resident found out later that they had tested positive for Covid.
2. A staff member who is in direct care of the Residents had contact with someone who had tested positive for Covid with potential exposure.

Based on information given to us by the CDC related to Covid's incubation period, we took the required steps to protect our Residents. As a result, there have not been any positive tests among our Residents and staff secondary to this possible exposure. God is good!

This past week as well, those who desired it were immunized for Covid. In thirty days we will receive the second injection. This will give us additional protection against Covid. The longer we remain virus-free, the better.

Let us pray for all those who are suffering the wrath of Covid. Let us continue to pray for the end of the pandemic in our world.

Please stay safe and God bless you!

Mother Francis and the Little Sisters of the Poor
